Phonstop Ceiling and Wall Tiles

Phonstop Ceiling and Wall Tiles are made from 100 percent recycled glass that has been sintered to form rigid, lightweight and porous sound absorbers. Phonstop offers NRC values from 0.70 to 0.90. Phonstop tiles are ASTM E84 Class 1(A) fire-rated. Non-fibrous, lightweight and durable, Phonstop tiles are simple to saw, drill, sand and more. Easy to clean, Phonstop tiles are also suitable for use with anti-graffiti systems and can withstand power washing. Phonstop V tiles can be directly installed to wall or ceiling surfaces. Phonstop E has a slightly beveled, square edge for installation in any standard 15/16" ceiling grid system.

Phonstop is eligible for LEED credits.

Check Out - ArtofAcoustics.com

ArtofAcoustics.com, by West General LLC, is a resource to facilitate application design of premier acoustic materials used for reverberant space treatment, and noise control. While performing their acoustic function, these materials offer a wide variety of looks and finishes. From metal and neutral colors designed into industrial applications, to soft foam, wood, and fabric colors and textures desired for schools, churches, libraries and conference rooms. Dramatic ceiling treatments, baffles, and banners that looks great in gyms, swimming pools, and large commercial spaces. Let us show you our wide range of colors, textures, patterns, and finishes, on materials which also help with your acoustics.

Let ArtofAcoustics.com help facilitate aesthetically pleasing designs for your acoustically demanding spaces.

We thank you for being a valued customer and look forward to working with you on future projects. Please give us a call.

Sincerely,
West General
